76 Derwent London 86 Morris+Company 88 Agents

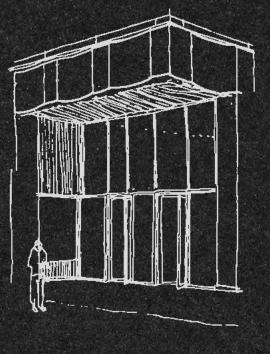

A warehouse for creative working.

# INTRODUCTION

The Featherstone Building is a 126,700 sq ft industrial-inspired workspace with a contemporary finish, located in the heart of the Old Street district, offering II0,000 sq ft of offices, 13,400 sq ft of shared amenity space, DL/28, and 2,350 sq ft of retail.

Completed by Morris+Company in April 2022, it is the latest development from Derwent London for Old Street, following the sister development opposite, White Collar Factory, which opened in 2017.

Inspired by the past, built for the future A hub of industry and creativity since the

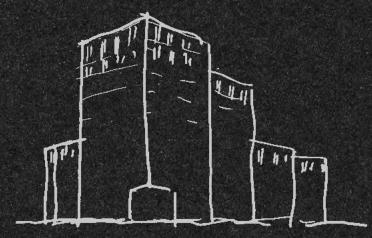

19th century, history shows that from 1887 the building housed workshops for master craftsmen and welders, bell yards, machine warehouses, a box factory and a cowshed. To ensure the building is a true reflection of its past, architects Morris+Company scrutinised the design and materiality of the eclectic mix of local buildings. The end result is a building whose 'stepped' exterior is staggered in both height and plan, giving the appearance of four adjoining warehouselike structures. It will both catch the eye and blend seamlessly into its neighbourhood.

# THE PLACE

A stone's throw from Old Street underground station and opposite the iconic White Collar Factory campus, The Featherstone Building stands on the corner of Featherstone Street and City Road: a gateway to the City of London to the south. To the rear it overlooks the Grade I listed park Bunhill Fields, with its calm, reflective atmosphere offering a contrast to the pace of urban life.

# A place like no other

Old Street, with its diverse mix of people and businesses, is constantly evolving. As a result there is always something new and exciting to experience in this vibrant corner of London, no matter the time of day.

Multi-disciplinary and modern, where award-winning boutique fitness meets art, design and fashion.

# Transport

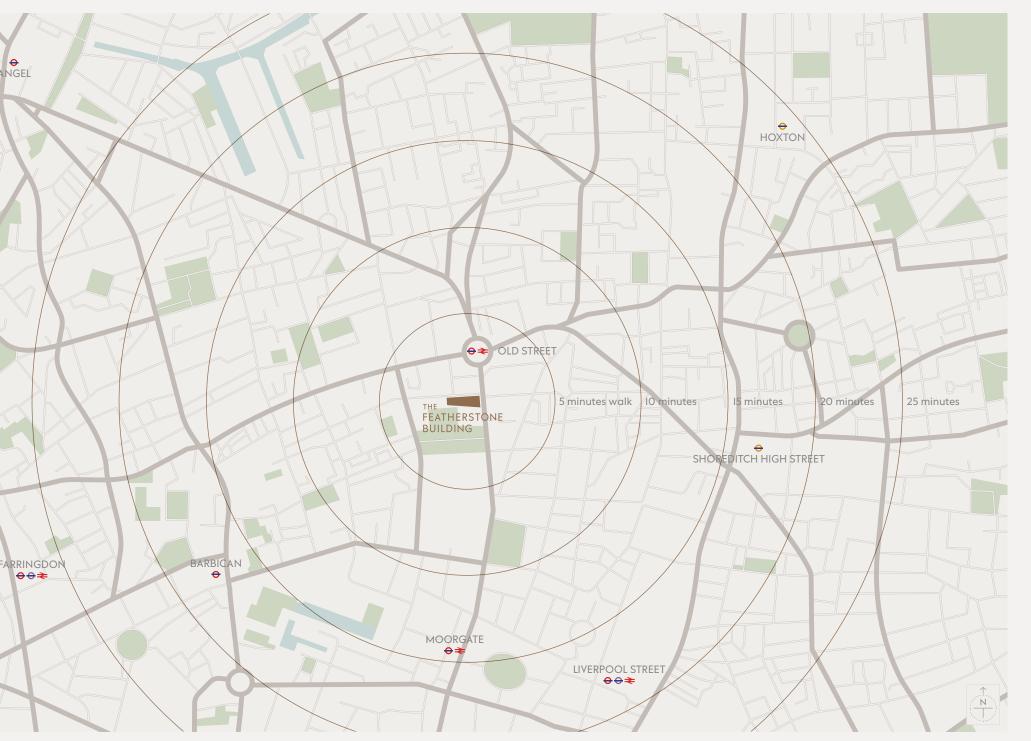

Less than a minute's walk away is Old Street underground station, where you can access the Northern Line and National Rail.

Twelve bus routes, including two night buses, stop at or near Old Street station, providing another quick and easy means to reach key parts of town.

For cyclists, the London Cycle Network Plus provides quieter routes to traverse the city, and runs along Featherstone Street, right outside the building. There are several cycle-hire docking stations in the area and The Featherstone Building has cycle access via its ground floor loading bay, where there is a cycle store for 202 cycles and 84 folding cycles.

# The Elizabeth line

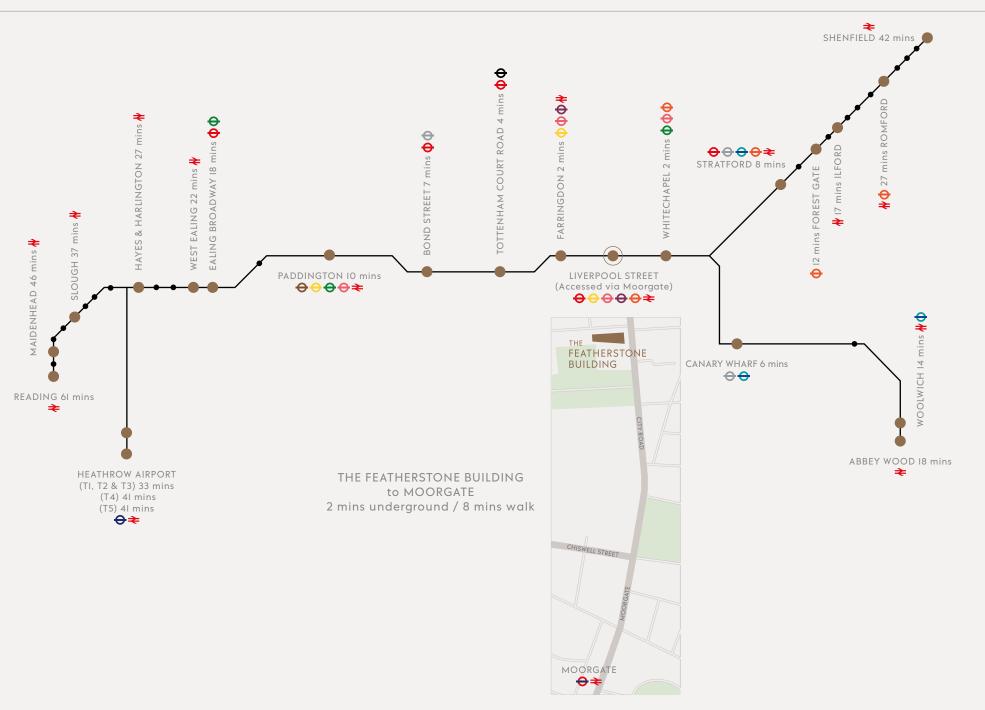

The Featherstone Building is extremely well connected to the rest of the City and beyond, which has improved with the arrival of the Elizabeth line.

Accessed via Moorgate station, just two minutes away on the Northern line or an eight minute walk, there's quick access to Liverpool Street station, where the Elizabeth line dramatically reduces journey times across London.

From Liverpool Street, Tottenham Court Road is only four minutes away, Canary Wharf six minutes, Stratford eight minutes, and Heathrow terminals between 33 and 41 minutes away.

# The Elizabeth line

# Regeneration

The future is bright for Old Street. Transport for London will make the area around Old Street station more pedestrian and cycle friendly. As part of the scheme they are:

- Adding signal-controlled pedestrian crossings and segregated cycle lanes
- Building a new public space around the new station entrance for easier access
- Building a designated public lift into St Agnes Well mall retail concourse

Old Street regeneration WestonWilliamson+Partners

Above Station entrance from the northeast, looking southwest towards White Collar Factory Right Green-roofed station entrance from the southwest

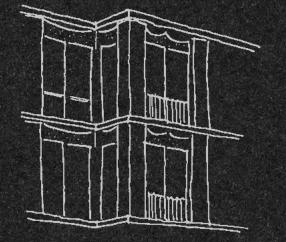

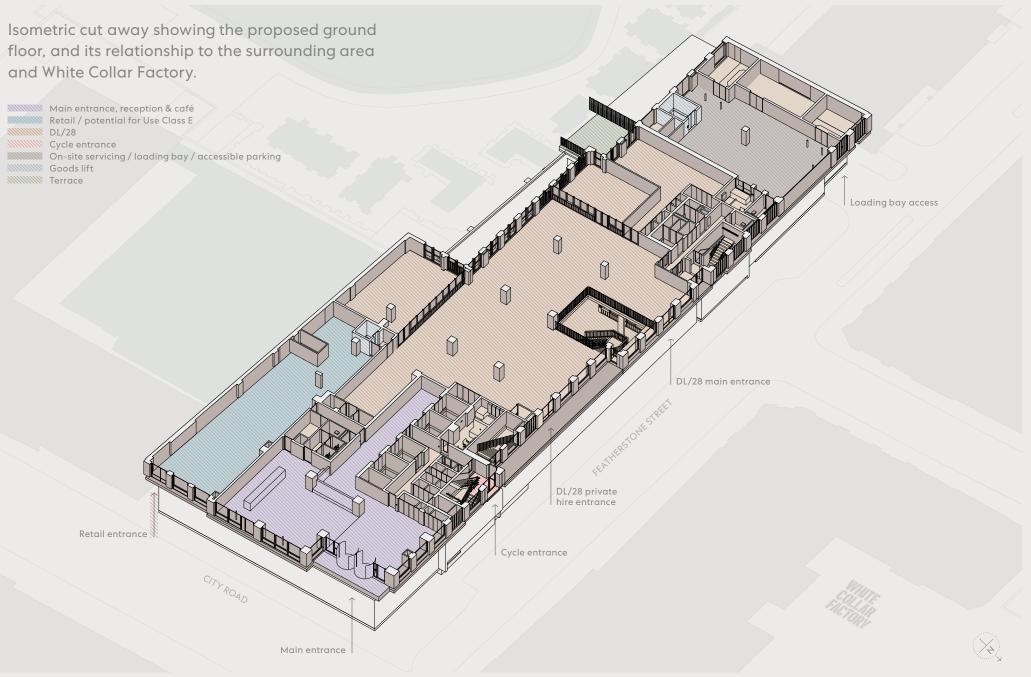

# THE SPACE

A brickwork façade, exposed concrete ceilings, generous windows and "stepped" design cleverly play down the scale of the structure by conveying the impression of four subtly contrasting buildings. The architecture echoes that of the Victorian warehouses that characterise the local area.

The Featherstone Building takes its inspiration from those warehouses, and is constructed to stand the test of time.

# Site plan

# Key features

- Situated next to Old Street underground and close to the Elizabeth line, accessed via Moorgate
- An Intelligent Building that delivers for the digital future
- Beautifully designed double-height reception with 7.5m floor to ceiling height
- Integrated café, DL/ Service launching autumn 2023 alongside informal collaborative space
- 3.125m floor to ceiling height on all floors
- Duplex space over ground and lower ground floors of 13,400 sq ft with Derwent London shared amenity, DL/28 opening autumn 2023
- Efficient floor plates of c.17,000 sq ft on the lower floors (Ist 4th) with soft spots for connectivity between floors, c.7,800 sq ft on the upper floors (5th - 9th) and c.3,600 sq ft on the 10th floor
- Openable windows throughout and exposed concrete ceilings
- Private terraces on ground, 4th, 5th and 10th floors
- Communal roof terrace and pavilion on the 10th floor
- Elegant external architecture using a natural brick palette
- I person per 8 sq m occupational density
- Concrete core cooling system allows an industrial aesthetic
- Lower ground cycle store for 202 cycle spaces and 84 folding cycles
- 222 lockers and 21 showers
- Achieved net zero carbon construction on completion
- Achieved EPC Rating 'A'
- Achieved WiredScore Platinum
- Achieved AirScore Design & Operation Gold
- Achieved BREEAM Outstanding
- Achieved LEED Platinum

# City Road façade

The Featherstone Building is characterised by solid vertical brick piers and concave concrete lintels. Viewed from the street it looks like four adjoining warehouse-like structures, though inside it is a single entity that can be configured in multiple ways.

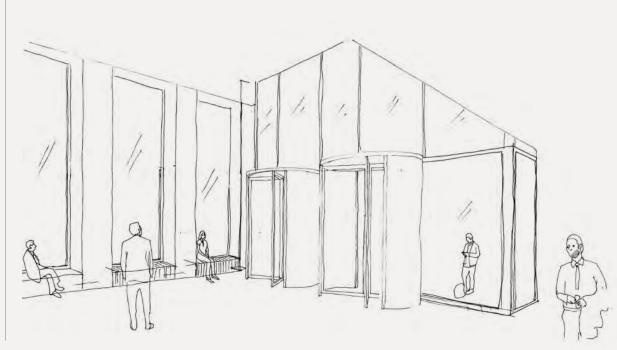

Below Architect's sketch of the City Road entrance

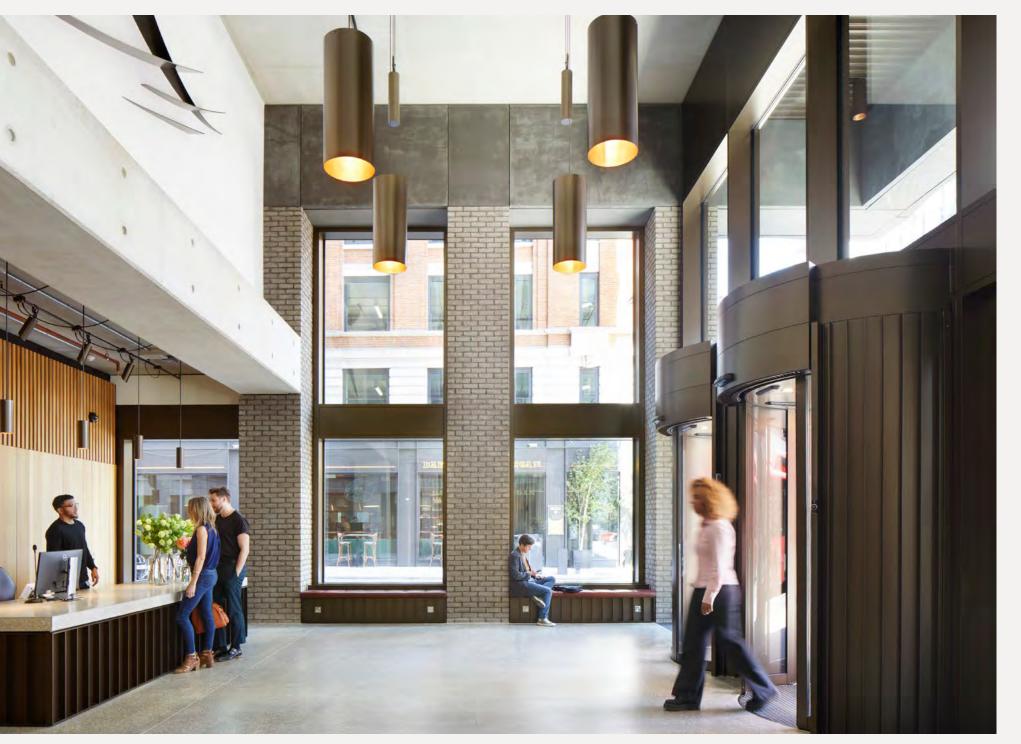

# Reception and café

- 2,950 sq ft combined reception and café
- Double-height entrance space with industrial pendants
- Seating set into window reveals
- Bespoke reception desk
- Integrated café, DL/ Service launching autumn 2032 alongside informal collaborative space
- Feature Hugo Dalton bespoke artwork above the reception desk

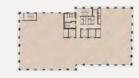

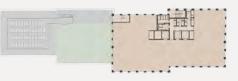

# Floor plans

Indicative look and feel

# **Roof terraces**

The building features multiple terraces; places to reflect, take a breather or enjoy with colleagues in the warm weather.

> 4th floor 183 sq ft

5th floor 3,494 sq ft

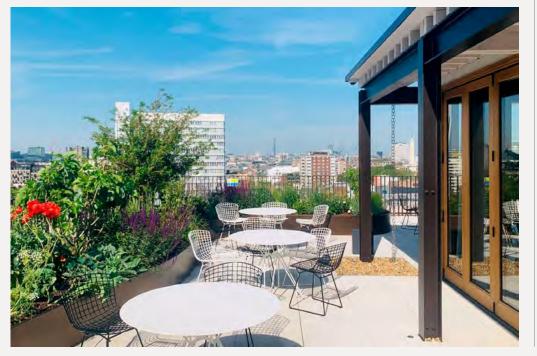

10th floor 848 sq ft (private) 2,996 sq ft (communal)

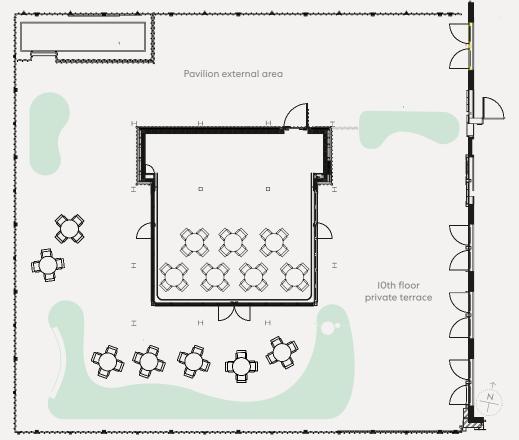

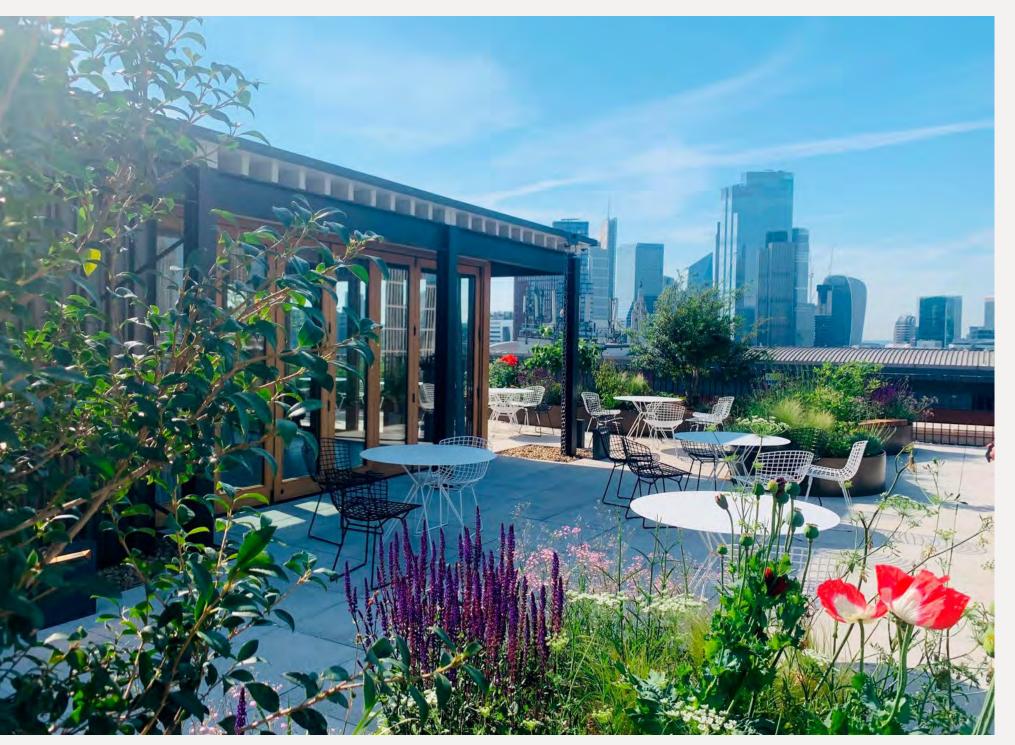

# 10th floor rooftop pavilion

The 10th floor pavilion is a vibrant biophilic space above the treescape of Bunhill Fields.

It is a sanctuary for connection and collaboration for the sole use of the office tenants, providing a calming space for informal working.

# DL/28.0LD STREET

Created for connection and collaboration, our DL/Lounges are inspiring hybrid spaces where Members can come to work, meet, eat, socialise and be inspired.

Following the launch of DL/78 in Fitzrovia, we are creating our second DL/Lounge, DL/28, over ground and lower ground floors at The Featherstone Building.

We designed these spaces for our community to gather, learn and share meaningful and productive experiences.

Opening autumn 2023, DL/28 will include:

- Communal collaboration and working areas in the Club Lounge
- Bookable meeting rooms configured to your needs
- One and two person phone booths
- Library for quiet working
- Multifunctional event and fitness space with self-contained entrance
- On-site café
- Curated events programme
- All connected via the DL/ App

28 Featherstone Street, Old Street ECI

Above Lounge and co-working space, ground floor Right Bookable meeting rooms via the DL/ App

# Lower ground cycle storage

- 202 cycle spaces
- 84 folding cycle lockers
- 222 lockers
- 21 showers including 4 flexible unisex cubicles

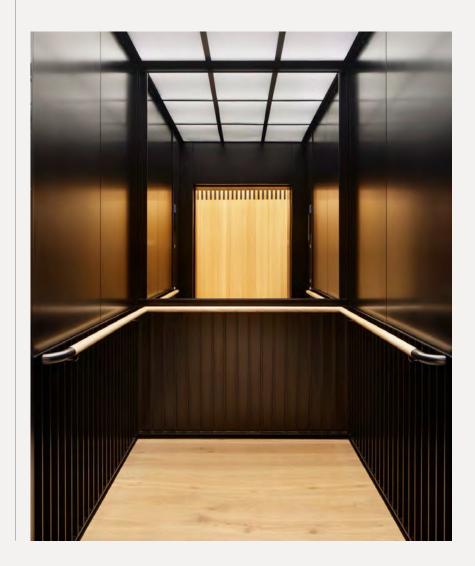

# Core and lifts

Design details

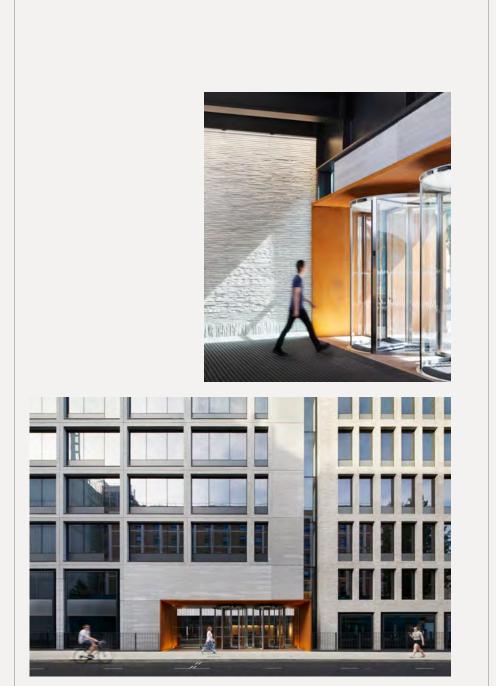

- Band-sawn oak flooring
- Concrete walls and soffit with exposed services
- Schindler passenger lifts

## **Responsible development**

As a responsible business, sustainability is deeply ingrained in everything we do. Our sustainability strategy encompasses green finance, the highest environmental standards throughout our supply chain, responsible management of our existing portfolio and helps drive the creation of some of London's most innovative new office developments.

Derwent London has been at the forefront of pushing for the highest sustainability standards for many years, underlined by our recent commitment to achieve net zero carbon (NZC) by 2030.

Top 80 Charlotte Street, WI entrance Above 80 Charlotte Street. WI elevation

**Set targets** to achieve NZC by 2030

setting out how we will achieve this:

renewable energy

- Offsetting residual emissions

### 2020

# 2021-2024

**Completed 80 Charlotte Street WI**, our first NZC development

#### Published our NZC Pathway

#### - Driving down

energy demand

- Investing in

Set building-specific operational targets

Procure 100% of energy from renewable sources

Roll out a programme for customer engagement

Monitor progress across the portfolio

2025-2029

Review our approach to carbon accounting and off-setting and reducing embodied carbon

Review our approach to renewable energy

# NET ZERO

2030

# A sustainable building curated by a responsible developer

We are committed to designing, delivering, and operating our buildings responsibly and The Featherstone Building is no exception. That is why the following features are provided to meet our NZC goals, enhance occupier wellbeing and support wildlife.

## **ACHIEVING NET ZERO CARBON**

**Energy consumption & costs** 

**Total anticipated operational** carbon use expected to be 50% less than best practice standards (based on REEB 2019 standards) - equivalent to 933 people moving to a plant-based diet.

Annual water consumption

expected to be 55% less due to water efficiency measures – equivalent to 2.2 Olympic sized swimming pools.

#### The Concrete Core Cooling

solution lowers operational energy use generating a 25% cost saving, lowers embodied carbon and extends the building's life.

The building will be supplied with 100% renewable electricity and gas.

**Onsite solar PV panels** will provide 2% of the energy for the building.

**Enhanced sub-metering will** enable occupiers to monitor their electricity and heat consumption. **Responsible construction** 

N-4

Low carbon concrete was used during construction, lowering the embodied carbon intensity of the building.

Use of pre-fabricated materials reduces pollution during construction.

Any carbon emissions created by the building which cannot be eliminated will be offset using certified schemes.

All timber used in construction is FSC/PEFC certified.

#### ENHANCING WELL-BEING

Active by design: the striking precast-concrete staircase encourages you to take the stairs over the lift, helping to add some extra activity in your busy workday.

Fresh air: openable windows and enhanced ventilation providing fresh air at your fingertips.

Natural light: floor-to-ceiling glazing and generous 3.125m ceiling heights flood natural light into the office, creating a bright and spacious environment.

286 cycle spaces with shower facilities allow occupiers to easily cycle to work, which is great for wellbeing and the environment.

**Thermal comfort:** the brick and solar coated glass façade reduces solar gain to help reduce overheating.

WELL fit-out: building designed to support this certification.

#### ENCOURAGING WILDLIFE

Biodiverse green roofs will provide a habitat for local wildlife.

#### We are pleased to support

the London Wildlife Trust at their Woodberry Wetlands Centre in Hackney – this initiative will help restore reedbed habitats and increase the diversity of wildflowers.

#### TARGETING STANDARDS

**BREEAM** Outstanding - Achieved

**LEED** Platinum - Achieved

**EPC** Energy Performance Certificate Rating 'A' - Achieved

# An Intelligent Building that delivers for the digital future

The Featherstone Building is a Derwent London Intelligent Building.

State-of-the-art technology and software reads data collected by thousands of sensors throughout the building. The Featherstone Building's software platform processes the data (such as energy usage, space utilisation, indoor air quality and hundreds of other data points) and intelligently learns how to maximise operational efficiencies, improve performance and comfort, minimise energy use, carbon emissions and energy costs and reduce maintenance and service charge costs.

# State-of-the-art digital enablement

#### Integrated building software and systems

All the building's systems and services are all interconnected through Derwent's Intelligent Building software, built on Microsoft infrastructure. Smart sensors read information generated (energy usage, internal air quality, population density, busiest lift times, quietest shower times) and intelligently change and tweak the building's systems to keep costs down and improve wellbeing.

#### Integrated digital team

Work in partnership with Derwent London's in-house experts and Intelligent Building team who specialise in innovation, software development, cyber security and building automation to create a customised solution that maximises your space, productivity and efficiency.

#### Smart enabled amenities

Book meeting rooms, sign-in quests, open doors and call lifts touch-free via the Derwent London App.

#### Cyber security

Your office data is delivered via a cloud-based dashboard and all systems are protected with a state-of-the-art cyber security framework meaning you and your data are protected from modern cyber threats.

#### Energy and costs savings

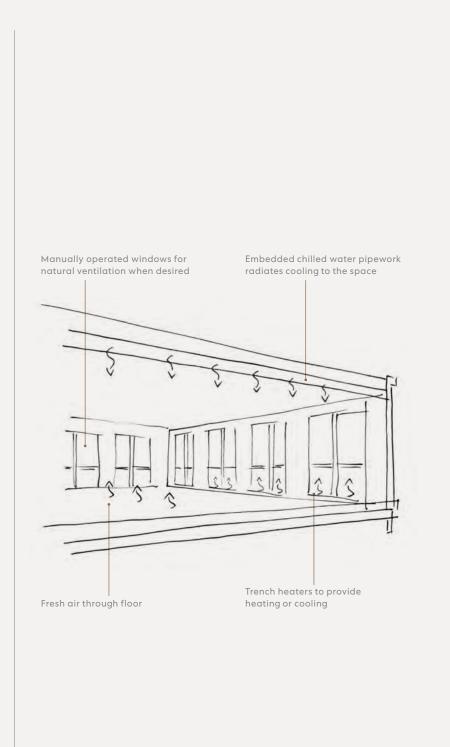

By using technology to focus on energy efficiencies, this has an inherent commitment to driving down costs.

The Featherstone Building will be a digitally enabled building ready for the digital future.

# Concrete Core Cooling (CCC)

Following White Collar Factory, Derwent London are integrating a CCC system into the building design at The Featherstone Building.

Unlike conventional air conditioning, CCC works with the thermal mass of the building's concrete structure to absorb the heat generated in the office. A network of chilled water pipes is embedded in the concrete, providing radiant cooling to the office environment. Additional heating, if required, is provided using hot water in trench heaters located around the office perimeter.

# **Benefits of CCC include:**

#### High ceilings

A 3.125 m floor to soffit height provides excellent daylight penetration, greater flexibility for fitting out, and improved comfort levels.

#### Natural ventilation

The building is designed with openable windows throughout, to enable natural ventilation whenever outside temperatures are between 14°C and 25°C (approximately 50% of occupied hours per year). This puts people in charge of their environment and provides a connection to the outside world, all controlled by the building's occupiers.

#### A clean ceiling with an industrial aesthetic

Uncluttered soffits make partitioning efficient to install, and ongoing alterations easy, providing maximum flexibility for a wide range of occupiers.

#### Carbon benefits

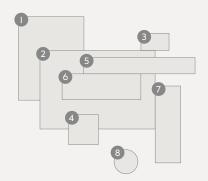

Using low cement content, exposed fair-faced concrete minimises our carbon footprint. Lower carbon emissions and operating costs also improve energy performance. CCC also harvests free night time cooling, which is stored for slow daytime release.

#### Passive & non-intrusive system

Low air movement means reduced draughts and provides for a quiet / calm working environment.

# Materiality

The Featherstone Building's exterior is clad in contrasting monochromatic shades of brick, and features generous filigree metalwork windows.

#### Materials Palette

- IRough hewn and acid etch smooth light grey concrete2Rough hewn and acid etch smooth charcoal concrete
- 3 Textured concrete charcoal paving slabs
- 4 Textured concrete light grey paving slabs
  5 Window system bronze finish industrial C channels
- 6 Handmade cinder grey brickwork

# THE TEAM

Derwent London is a different kind of developer – a design-led creative office specialist providing unique workplaces where occupiers become long-term partners. We look for prime sites with hidden potential where we can develop best-inclass buildings with generous volume and excellent natural light. Good transport links are vital. We are known for our flexible approach to ever-changing workspace requirements.

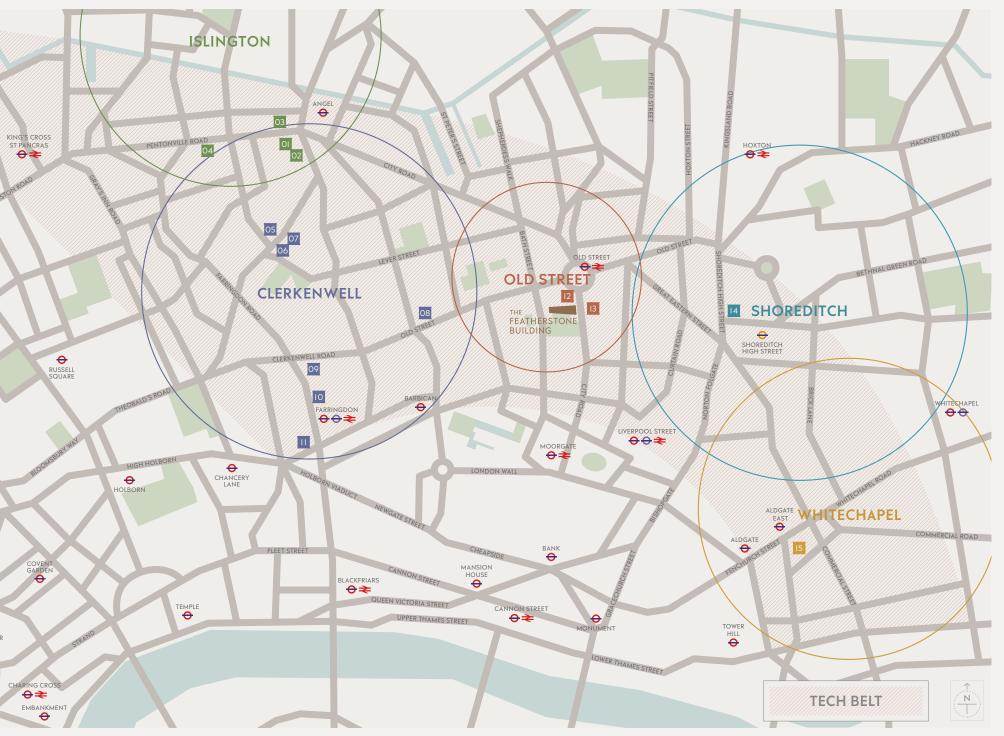

# **Derwent London**

A key part of our business model has been an industry-leading commitment to architecture, research and responsibility. We believe this approach helps us to deliver inherently sustainable spaces which are attractive to occupy and efficient to operate. We are committed to making better places and contribute to local communities.

## Architects: Morris+Company

The company of architects, which in 2018 evolved out of longstanding Derwent collaborators Duggan Morris, draws inspiration from the robust, adaptable buildings of Victorian industrialists. Morris+Company's buildings pay homage to the past while adding new elements and layers to the story.

Meticulous researchers of local stories, styles and traditions, Morris+Company have the inquisitive nature of investigative journalists — allied to forensic skill of master crafts people. In the planning stages, a building's features and materials are refined over and over until the perfect form is found.
